To whom It may Concern:

Over a year ago a man came by my house at 3706 Plaza Park Dr. Garland, Tx. zip 75042. He hardly spoke English but he said that AT&T was wiring every house on this street. Then I gave him permission to wire my house also. There after I was billed by Comcast not AT&T. Comcast stated they were doing the wiring ~~for~~ AT&T since my income was very low & I am disabled following a bout of pneumonia and living on Oxygen. They offered me a Lifeline program but two days ago I received a letter from Time Warner Cable stating my phone service would be disconnected on or about June 19, 2007, both local & long distance, if I did nothing! (This was my first encounter with Time Warner Cable!) After initially being wired by AT&T, paying all my phone bills to Comcast & now a letter by Time Warner Cable I have been trying to find another long distance company but have been told by Verizon they could offer me a "Lifeline" Program after I had paid them about \$50., only initially! I am unable to find a reasonable substitute service after much searching! According to § 63.71 of discontinuance of my phone service by Time Warner ^{Cable} will be unable to call my doctor or obtain medical services. I do not know what Time Warner

states that they are carrying me although all
of my monthly billings have been paid to Comcast!
Thank you for your Courtesy & Cooperation!
